Recent Work Experience

Senior Software Engineer – W.W. Grainger, Inc.

October 2021 - September 2024

• Part of the Core Engineering team that was responsible for building, documenting, & supporting the design system and various other tools that are relied upon by various teams across the 1000+ person engineering organization. This team was responsible for saving over 5400 hours of engineering work during my tenure

Senior Software Engineer – PayPal

July 2020 - August 2021

- Part of the Checkout Integrations team that worked on the company's flagship service which handles \$100+B
 in payment volumes across 200+ countries for millions of active users a month
- Primary developer and point of contact for our "Pay w/ Venmo" desktop solution, enabling users to generate a QR Code that allows them to complete the checkout process via their mobile device

Software Engineer – Onion Inc. | G/O Media

September 2017 - April 2020

- Part of the team that worked on Kinja, the CMS powering some of the internet's favorite sites like Gizmodo, Lifehacker, Kotaku, and The Onion; reaching 85-100 million active users a month
- Helped migrate and rewrite our core platform from a Scala w/ Closure templates & Backbone.js to an Isomorphic JavaScript (Express & React) solution
- Implemented & mantained advertising integrations which optimized delivery & tracking, ensuring high performance and relibility across the platform
